**TeraMedica Healthcare Technology signs partnership agreement with
Compressus Inc. MEDxConnect Software Solutions**

Joint Venture Provides Customers with Vendor of Choice and Quality of Care Solution

MILWAUKEE, Wisconsin, April 15, 2009—TeraMedica Healthcare Technology, an enterprise imaging and information management company, announced today that they are partnering with Compressus Inc., a leader in interoperability and workflow solutions.

“This partnership delivers a unique enterprise approach to providing a comprehensive clinical workflow, data management and unified view to the resident EMR System. As with all facets of TeraMedica, this partnership has been created due to customer and market demand” said CEO Jim Prekop.

“The goal is to create an environment for healthcare practitioners to work more efficiently and cost effectively. Compressus MEDxConnect offers a software solution that overcomes the hurdles associated with medical imaging interoperability. It connects existing imaging systems and databases making them accessible via a single worklist. MEDxConnect acts as a communication hub, allowing information exchange to occur enterprise-wide, and provides the physician with access to all pertinent patient information in a seamlessly and consistent format. The solution is customizable and manages auto-routing for subspecialty reads which improves workflow. Higher throughput is accomplished, with a better accuracy and reduced staffing while improving quality of patient care,” states Janine Broda, CMO Compressus.

Leveraging the synergies of TeraMedica’s Evercore®-Clinical Enterprise Suite solution and the Compressus MEDxConnect product suite allows physicians and patients alike, to instantly access medical images such as X-rays, MRI scans or Cardiology exams, as well as other types of clinical digital content such as electronic reports, from a single worklist.

About TeraMedica Healthcare Technology

TeraMedica provides medical informatics that will transform the doctor and patient relationship. TeraMedica offers a broad range of software that collects digital medical images from diverse data sources across vast health care systems and manages them in a single patient snapshot. TeraMedica is privately held and is headquartered in Milwaukee, Wisconsin. TeraMedica is committed to providing technology solutions to the health care field that enhance patient care. About Compressus Inc.

Established in 2000, Compressus, Inc. is a medical software company offering proven solutions for problems of interoperability and interconnectivity in the rapidly growing healthcare IT market. Its MEDxConnect software is the first solution that indexes, integrates and routes all relevant patient medical information to the healthcare professional in real time, thus dramatically improving physician efficiency, reducing enterprise costs and increasing patient safety. The MEDxConnect products address the problems associated with integrating healthcare enterprises plagued by the lack of connectivity and interoperability between disparate vendors of HIS, RIS and PACS systems. Designed to manage the workflow of an imaging healthcare enterprise, the MEDxConnect System is a suite of offerings that has the power to connect disparate HIS/RIS/PACS systems and provide automated interoperability to the enterprise and allows an organization with disparate multi-vendor systems to function as one virtual enterprise.
